

## **Environmental Analyst**

Wenck Associates, Inc. is a successful engineering, environmental, and business services firm with an excellent compensation and benefit package for our employee-owners. We are in our 27<sup>th</sup> year of business.

We seek someone with 1-3 years of experience in environmental compliance and experience working with RCRA. The individual should have excellent written and verbal communication skills with experience working with Local, State or Federal agencies a plus. The education requirement is a Bachelor of Science degree in environmental science or policy or related field. Strong analytical skills are a must for this position. The immediate opportunity for this role would be to help a large national organization in implementing hazardous waste programs to locations around the country, facilitate regulatory reporting, and respond to agency inquiries.
